UNK PE 459 students helped raise money for Hurricane Katrina victims. The sports marketing class, in conjunction with the UNK Athletic Department, raised $487 at the Sept. 22 Loper volleyball game.

The funds will be donated to the American Red Cross. Hurricane Katrina Relief Fund, and distributed to rural families that were affected by the hurricane.

Runza donated 10 percent of the night’s concessions to the effort as well. Shawn Fairbanks, assistant to the athletic director, said, “This shows the kindness of the community. We are helping other people who live in a place like Kearney.”

At the consortium, these students from UNK, Maria Morales, Anne Nagel and Stuart Lenz, were given the opportunity to participate in a panel presentation of their personal experiences upon completing the service learning projects.

"I had a really good time at the consortium. It was neat to be around people interested in learning through serving," Nagel, an education major from Kearney, said. "I attended panel discussions that opened my eyes to the kinds of difficulties, as well as advantages, in trying to set up programs that integrate community service learning at schools.

"Service learning is not a program that is strictly related to teacher education majors. Stirtz hopes to create more opportunities for service learning projects in other disciplines of study. It is important to focus on student involvement, to look at the bigger picture," she said.

Not only does Stirtz direct and facilitate the service learning for the teacher education program, but she also teaches a graduate-level course on service learning and has developed the Service Learning Corps of Rural Nebraska, and AmeriCorps program for teachers in the K-12 system. Twenty-three teachers in the area were enrolled for the program.

"Service learning means you have to learn and learn to serve," Stirtz said. "Service learning is more than doing community service," Stirtz said. "It is important to focus on students learning, not just doing community service. They learn about themselves, but also about the needs of the ‘other,’" Stirtz said.

"Service learning is not a program that is strictly related to teacher education majors. Stirtz hopes to create more opportunities for service learning projects in other disciplines of study. It is important to focus on student involvement, to look at the bigger picture," she said.

"When students complete their service learning projects, they see the meaning for what they are doing; they feel appreciated and they like the feeling of helping someone in need," Stirtz said. "They grow through this experience."
Blog our way to the future

Matt Fisher

Have you read a good book lately? Perhaps a magazine? Even a newspaper? While the aforementioned media are popular and have been for quite some time, a new form of expression is sweeping the nation. A medium that not only lets someone read about another person’s dinner the next day, but allows them to engage in a conversation with the author of that dinner. This concept is known as blogging.

According to an Aug. 9 posting on www.dictionary.com, a blog is “an online diary; a personal chronicle by way of the Web.” Pretty simple stuff really, as users don’t have to abide by typical restrictions of grammar, they are free to write in any way they see fit. This is what makes it so popular?

“Blogging is the average consumer the user, blog readers are significantly more likely to be younger and better educated and access the Web via high-speed connections,” said the www.cnn.com report. But has the blogging community in general?

What lies in the future for bloggers and the blogging community in general? According to www.dictionary.com, “blogging is an online diary; a personal chronicle by way of the Web.”

But how does it work? As with any new entity, the majority of money comes from advertising. While Coca-Cola isn’t going to be hanging on any bloggers’ doorstep anytime soon, there is a service called Google that can add the bloggers’ extra lines to the wall of websites everywhere.

E-Dating is Love at First Type

Julie Stonak
News Editor

Cancer-oriented women discover the Internet to find romance.
Lisa Siegel, 50, had been single for a long time when four years ago, one of her friends suggested that she try an online dating service.

"I was really reluctant," she said. "I could not see myself putting information and pictures on a site. I wanted to control the situation. It was a very scary idea to me not to know the people and interact with them. But since I didn’t hang out at bars, and with a very busy career and travel schedule, I thought it might be worth a try."

Among many other safety tips regarding online dating, Match.com suggests on its Web site to use common sense, trust your instincts, talk on the phone before you meet and meet in a public place at a time when many people are around.

UnK Theatre presents ‘Godspell’

Sherry Rader
Staff Writer

Opening night for Godspell was on Thursday evening and will continue to run on Friday and Saturday, Oct. 6-7 at 7:30 p.m. in UNK’s Miriam Drake Theatre.

Godspell was conceived and originally directed by John-Michael Tebelak with music and new lyrics by Stephen Schwartz. UNK’s production is under the direction of Daniel M. Jones. The entire design and stage management team for this musical is made up of students with the exception of Director Jones and Musical Director, Anna Foreman.

Jones said Godspell celebrates the human spirit and sends a renewed message of hope in a production set against a backdrop of the terrorist attacks in New York City on Sept. 11, 2001. Jones said, “We put this in a context that everyone in our society can identify with. It’s not just about religious values, but moral values.”

The cast of Godspell includes: Brett Covington, Rustamus Fairman, Chance Hartman, Jordan House, Jonas Johannsen, Steve Ingemansen, Joe Kapell, Brian Miller, Grant Pepper and Ruthann Williams. The artistic and production staff includes: Lighting Designer, Kris Haack; Makeup Designer, Chance Hartman; Choreographer, Joshua Don Hormann; Scene Designer, Takashi Morimoto; Sound Designer, Jim Jagodzem; Assistant Stage Managers, Brad Pense and Sarah Schreiner; Stage Manager, Starmo Warren; and Costume Designer Mikako Toda.

There were Michael Jackson impressions, ribbon dancers, boy band performances, dancing horses, and even the ever-so-famous Napoleon Dynamite dance number.

UNK and Loper Programming and Activities Council presented the annual homecoming lip sync and royalty coronations, ribbon dancers, boy band performances, and a dance to Jessica Simpson's newest hit, "Stayin' Alive." Third place went to Chi Omega and Sigma Phi Epsilon who, of course, had the human dancing bananas to keep the crowd's enthusiasm for the much anticipated school spirit competition.

Local radio broadcasters who utilize the Internet for news research are facing the challenge of reporting accurate and reliable information gathered from e-mails and Web sites.

The possibility of using misleading information on the Web forces the broadcasters to investigate the validity and reliability of these sources.

“There isn’t a specific policy about how the Associated Press handles this, but I can certainly say that if it’s just someone out there to check it in as much as possible,” Dave Jenner, sports director of KNEB in Kearney, said. “If you can always at least double-check your Associated Press sources, it’s always at least double-check your Associated Press. Jenner explained, “We have received fatal errors are sometimes found in e-mails from e-mails and Web sites.”

According to Jenner, nearly 95 percent of his sports news and information arrives to him via sources such as the Associated Press. Altmaier estimated that nearly 25 percent of his news originates from online sources.

“Because so much of my sports content comes from online sources, it’s made my job at KNEB a lot easier,” Jenner said. “It’s also made it easier.”

You need a backup plan at all times, he said. “I was using sources from sources fail you.”

Although online sources have helped the Associated Press, Jenner noted, “The Web has definitely made it easier to contact sources. But it also leads me to the point where I have to be more creative and think outside the box.”

Many online resources are available to reporters to help them with their assignments. These resources are available to reporters who can check e-mails and e-mails containing misleading information, fact-checking sites and e-mail services.

The Nebraska Educational Association, founded in 1869, is working to educate the public on the need to educate people on the Web, the for e-mails and Web sites.”

Molly Albrecht, Guest Writer

UNL alumna Christine Korak (’94) said she believes that online personals sites are not worth the time. “My phone was turned off last month in April. I moved from her hometown of Kearney, Neb., to Pasadena, Calif., to study at the California State University of Culver City. I met someone on the Web site, and I met my wife on this site.”

Korak said she was surprised to meet her husband on the Web site, and she was very happy with her marriage. “I met my wife on this site.”

The Web site, located at http://www.dating safety/fml, lists several ideas for escaping online abuse.

“Keep your personal information private. Cautiously evaluate people you meet online. Have your wife or your partner when meeting real people. Try out your instincts. Beware of totally free personal services.

An explanation of these safety tips can be found at: http://wwwحقوقية.org/human_services.aspx. You can also find information on the Web site of the Mahabharata, an ancient book containing the story of how people might react,” Williams said. He pointed out that many people have Internet friends who might get someone else in trouble.”

In addition, the Web site offers a way to get in touch with friends and family around the world. “We really wanted to create e-space for new friends and old friends to use this medium,” Williams said. “We really wanted to create the next generation of people’s lives.”

“MySpace CEO Chris DeWitt, said in an online article from the December 3, 2003 issue of USA Today: “We really wanted to create the next generation of people’s lives.”

“Single people can meet and interact with other singles from across the world.”

MySpace began in September 2003 and has reached the 25 million user mark. “We really wanted to create the next generation of people’s lives.”

“People can truly put their lives online, with their friends and family.”
